MAYOR OF LONDON

Shirley Rodrigues,
Deputy Mayor, Environment & Energy

MAYOR OF LONDON

Patrick Feehily,
Assistant Director, Environment

MAYOR OF LONDON

A City for all Londoners

Direction of travel
Commits to strategies

This is the start of the
conversation...

- 6 workshops covering growth, transport, inclusivity, environment, housing, economy
- Community Focus Groups
- Online debate

LONDON GOVERNMENT

Greater London Authority (GLA)

- Established in 1999 and currently led by Mayor Sadiq Khan
- Responsible for strategic planning
- Transport for London
- Metropolitan Police Service
- London Fire and Emergency Planning Authority
- London Legacy Development Corporation

33 Local Authorities

- 32 London Boroughs and City of London
- Responsible for local services

Multiplicity of other public bodies and privatised utilities

Mayoral Strategies

- London Plan
- Housing
- Transport
- Economic Development
- Environment
- Health and Health Inequalities
- Cultural Strategy

MAYOR OF LONDON

Environment Strategy

- Localism Act: Enables 6 Environment Strategies to become 1 London Environment Strategy
- GLA Act: LES must cover environmental, social and economic purposes, health and health inequalities, sustainable development and climate change met through Integrated Impact Assessment
- The Mayor shall consult the Assembly, functional bodies, London boroughs (LBs), City of London and any other person or body considered appropriate
- LES must include Biodiversity, Municipal waste management, Climate change, Energy, Air quality, Noise + **general assessment of environment.**

London Environment Strategy/IIA – Evidence Base

Relevant Plans
and Programmes

Enviro Indicators

Social Indicators

Economic
Indicators

Manifesto
commitments etc

Problems and Opportunities – Relevant to LES

**LES Themes and IIA
Objectives**

**Indicators and General
Assessment of Environment**

An integrated environment strategy – Good Growth

- In the context of COP21 and Population Growth
- Delivery on key manifesto commitments - Zero Carbon by 2050, Air Quality, National Park City, Waste and Water
- In an integrated manner e.g. AQ and Health, Energy and Fuel Poverty, Growth in Green Economy
- Growth not a threat but a catalyst
- E.g Delivering better greenspace
- Better environment, better health, more jobs

Fairness & Social integration

Population growth

**A HEALTHY, RESILIENT, FAIR,
& GREEN CITY**

Climate Vulnerability

- High flood risk
- Unsustainable drainage & sewerage
- Poor water quality
- Overheating

Green Infrastructure

- Pressure (loss, quality)
- Low ecological resilience
- Poor design

Noise

- High noise levels

Air Quality

- Poor air quality

Smart solutions

**RESOURCE-
EFFICIENT CITY**

Energy

- Inefficient transport & building stock (incl. static emissions)
- Fuel poverty
- Low carbon generation & supply
- Missing emission targets
- Ineffective energy system

Waste

- Waste infrastructure
- Poor municipal waste recycling
- Waste market failure
- Litter

Water

- Supply infrastructure

Climate Change

Natural capital

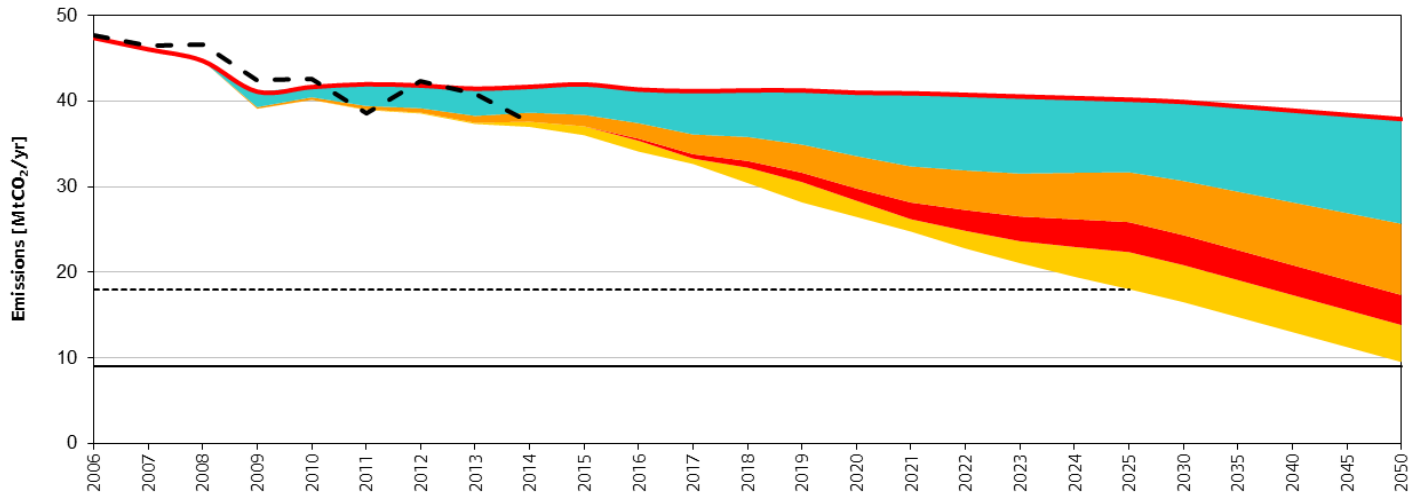

Circular economy

Proposed Structure

- Themed Outcomes by 2050
- Interim targets
- Actions
- Role of GLA and partners
- Milestones and KPIs

MAYOR OF LONDON

What do we need from you?

- Outcomes – What do you want to see that is different by 2050?
- Have we covered everything?
- What kind of policy response required?
- Who is responsible?
- What type of intervention – advocacy lobbying, delivery?
- Specific role of the GLA?
